

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, AUGUST 25, 2005 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3**

CURRENT SITUATION:

Initial attack activity was light nationally with 137 fires reported. Seven new large fires were reported, three in the Southern Area and two each in the Eastern Great Basin and Northern California Areas. Four large fires were contained, two in the Eastern Great Basin Area and one each in the Northern Rockies and Northern California Areas. Very high to extreme fire indices were reported in Alaska, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah and Washington.

An Area Command Team (Rounsaville) has been tasked by the National Multi-Agency Coordinating Group to evaluate radio communications on incidents with consideration to training and education, maintenance and replacement of equipment, narrow banding, communication and coordination with cooperators, and usability.

NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

PROSPECT, Lolo National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This fire is 12 miles south of Superior, MT in timber. Poor access, steep terrain, and heavy fuels continue to hinder containment efforts. Structures remain threatened. The fire continues to creep and smolder in pockets of heavier fuels; isolated torching was observed.

SELWAY-SALMON COMPLEX, Bitterroot National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the El Capitan, Wapiti, Beaverjack, Reynolds Lake and numerous other fires, is 26 miles southwest of Hamilton, MT in timber. This complex, burning on both the Salmon-Challis and Bitterroot National Forests, is being managed to accomplish resource objectives. A campground, work center, historic ranger station, cabin and two lookouts are potentially threatened. Structure protection remains in place. Magruder Corridor Road is closed to through traffic. Trail closures remain in effect. Creeping and active surface fire was reported.

SIGNAL ROCK, Bitterroot National Forest. A Type 2 Incident Management Team (Benes) is assigned. The fire is 17 miles southwest of Philipsburg, MT in timber and is burning on both the Bitterroot and Beaverhead/Deerlodge National Forests. Cooler temperatures and higher humidity decreased fire behavior along most of the perimeter. Active ground fire was observed along the southwest corner.

LONG BLACK COMPLEX, Clearwater National Forest. This complex, comprised of the Long Creek and Black Canyon fires, is 38 miles northeast of Pierce, ID in timber. Steep terrain, numerous snags and limited access continue to hamper containment efforts. The fire perimeter remains active, with torching and occasional short upslope runs reported. The Long Creek fire continues to be monitored by air.

CEDAR, Clearwater National Forest. This fire is 18 miles northwest of Kooskia, ID in timber. Structure protection is in place. The fire is in monitor status. No new information was reported. This will be the last report unless new information is received.

DEVIL, Clearwater National Forest. This fire is 13 miles west of Lochsa, ID in timber and brush. No new information was reported. This will be the last report unless new information is received.

ROCKIN, Bitterroot National Forest. This fire is 10 miles northwest of Darby, MT in timber. No new information was reported. This will be the last report unless new information is received.

CENTER, Nez Perce National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 23 miles southeast of Elk City, ID in timber and is being monitored by air. No new information was reported. This will be the last narrative report unless significant activity occurs.

NORTHWEST AREA INCIDENTS / LARGE FIRES:

BURNT CABIN, Umatilla National Forest. A transfer of command from Johnson's Type 2 Incident Management Team to the local unit will occur today. This fire is 16 miles southeast of Milton-Freewater, OR in timber. Observed fire behavior was minimal with most activity occurring in small groups of trees and interior islands of unburned fuels.

FLY, Wallowa-Whitman National Forest. A Type 2 Incident Management Team (Goheen) is assigned. This fire is 20 miles southwest of La Grande, OR in grass, timber and slash. Several private cabins are threatened. Fire behavior was limited to creeping and smoldering.

FIR CREEK, Burns District, Bureau of Land Management. This fire is 11 miles east of Frenchglen, OR in sagebrush and grass. Remote structures, campgrounds and wildlife habitat are threatened. Fish Lake and Jackman Park Campgrounds are under a precautionary evacuation. Moon Hill Road is closed to public access. Individual torching and flare-ups in unburned islands were observed.

LITTLE BRIDGE CREEK, Burns District, Bureau of Land Management. This fire is 12 miles east of Frenchglen, OR in grass and brush. Poor access and steep terrain are hampering containment efforts. No further information was received.

GRANITE COMPLEX, Wallowa-Whitman National Forest. A Wildland Fire Use Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is 30 miles east of Enterprise, OR in timber and grass. Structure protection remains in place for historic cabins in the area. An area closure remains in effect. Single tree torching and short crown runs, along with moderate surface fire spread were observed.

FLOOK LAKE, Sheldon-Hart Mountain National Wildlife Refuge Complex. This fire is 46 miles northeast of Lakeview, OR in grass and sagebrush. No new information was reported. This will be the last report unless new information is received.

WILLS CANYON, Central Oregon District, Oregon Department of Forestry. This fire is nine miles southwest of Spray, OR in brush. No new information was reported. This will be the last report unless new information is received.

NORTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

BARREL, Northern California Resource Area, Bureau of Land Management. A Type 2 Incident Management Team (Giachino) is assigned. This fire is 13 miles northeast of Fort Bidwell, CA in brush and timber. Structures and wildlife habitat are threatened. Heavy fine fuel loading, rugged terrain, winds and low relative humidity are hampering containment efforts. The fire remained very active through the night.

HARDING, Tahoe National Forest. This fire is two miles northeast of Sierraville, CA in sagebrush and mixed conifer. A Type 2 Incident Management Team (Sinclair) has been ordered. Structures are threatened. Moderate to rapid rates of spread with torching was observed.

WESTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

SHERMAN, Elko Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Muir) is assigned. This fire is 15 miles north of Elko, NV in grass and sagebrush. Steep terrain and limited access are hampering containment efforts. The community of Ryndon is threatened. Structure protection measures are in place. Smoldering, creeping and running fire behavior were reported.

VOR-MCCARTY, Nevada Division of Forestry – Northern Region. This fire is seven miles south of Elko, NV in juniper, sagebrush and grass. The community of Ten Mile and historical sites remain threatened and protection measures are being implemented. Minimal fire behavior was observed with some interior tree torching.

DISASTER, Winnemucca Field Office, Bureau of Land Management. This fire is 30 miles west of McDermitt, NV in brush. Rangeland and wildlife habitat are threatened. Smoldering fire behavior was observed. No new information was reported.

EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

PELICAN POINT, Northwest State, Utah Division of Forestry, Fire & State Lands. This fire is ten miles southeast of Fairfield, UT in grass. Residences, communication towers, an explosives plant and a VHF omnidirectional range navigation beacon (VOR) are potentially threatened. State Route 68 is closed. Wind-driven fire runs and spotting were reported.

GOVERNMENT CREEK, Northwest State, Utah Division of Forestry, Fire & State Lands. This fire is eight miles south of Elberta, UT in juniper and grass. Difficult access and steep terrain along with gusty winds are impacting containment efforts. Creeping, smoldering and isolated torching were observed.

FRANK CHURCH, Payette National Forest. A Wildland Fire Use Management Team (Hahnenberg) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, comprised of the Bear Creek, Root Creek, West Fork/Joe, Missouri Ridge and several other fires is 50 miles northeast of McCall, ID in timber. The fire is being managed to accomplish resource objectives. Commercial property, residences and historical structures are threatened; structure protection is in place. The majority of growth occurred on the West Fork/Joe fire. Four fires remain inactive.

FIVE SPRING, Northwest State, Utah Division of Forestry, Fire & State Lands. This fire is 20 miles northwest of Evanston, WY in brush and slash. Creeping and smoldering were observed. No further information was reported.

ALASKA AREA INCIDENTS / LARGE FIRES:

BEAVER CREEK, Alaska Fire Service, Upper Yukon Zone, Bureau of Land Management. This fire is 45 miles northwest of Fairbanks, AK in black spruce. Private residences remain threatened. Crews used direct attack and made significant progress on portions of the fire. Precipitation was received on the fire and minimal fire activity was observed.

COLEEN MOUNTAIN, Alaska Fire Service, Upper Yukon Zone, Bureau of Land Management. This fire is 40 miles northeast of Chalkyitsik, AK in black spruce, hardwoods and grasses. Native allotments and cabins at Fishhook Bend and Canyon Village are threatened. Structure protection measures are in place. Burn out operations are continuing near Canyon Village. Backing, running and crowning fire behavior were observed.

TALBIKSOK, Alaska Division of Forestry, Southwest Area Forestry Dispatch. This fire started on Fish and Wildlife Service land 15 miles southeast of Russian Mission, AK in mature white spruce, birch and black spruce. Smoldering and creeping were observed.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

WF UNIT 11 2005, McFaddin National Wildlife Refuge. This fire is located 20 miles east of Winnie, TX in grass. Smoldering fire behavior was observed.

CR 3101, Texas Forest Service. This fire is located 12 miles north of Carthage, TX in plantation slash. No further information was received.

CANEY CREEK, Texas Forest Service. This fire is located five miles northeast of Gilmer, TX in plantation timber. High temperatures are hampering containment efforts. Crown fire was observed.

OUTLOOK:

Weather Discussion: The upper level weather disturbance will continue to move east today across the Rockies as a weak high pressure ridge starts to build into the Pacific Northwest. Breezy conditions will move over portions of Montana, Wyoming, and South Dakota. Temperatures will warm today in the Northwest and western portions of the Great Basin. Offshore flow will continue along the Northwest coast for poor overnight relative humidity recoveries and breezy east winds at times. Mainly wet thunderstorms over southeastern portions of Wyoming through Colorado into the Southwest will decreased in coverage today. Showers in Alaska will move east with greatest emphasis over the southeastern portion of the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Northern Rockies Cool temperatures and higher humidity values will continue. Gusty winds east of the divide across Montana and North Dakota.	All areas: 70s.	West of divide: 20 to 30%. East of divide: 25 to 35%. North Dakota: 35 to 45%.	West of Divide: 5 to 15 mph. East of Divide: Northwest 20 to 35 mph. North Dakota: Northwest 20 to 30 mph.
Northwest Sunny.	Warming. 70s and 80s north and 80s and 90s south.	West of Cascades: Dry mostly 20 to 35%. Eastside generally 15 to 25%.	Mostly easterly 7 to 16 mph west of Cascades and 5 to 12 mph eastside.
Northern California Sunny.	90s to near 103 inland valleys, 80s mountains and 60s to 70s near the coast.	5 to 15% east of the Cascade-Sierra crest and 12 to 25% elsewhere inland.	Southwest to northwest 5 to 10 mph with gusts to 22 mph coastal areas and east of the Cascade-Sierra crest, and southeast to southwest 4 to 8 mph with gusts to 17 mph elsewhere.
Southern California Morning low clouds and fog coastal areas, otherwise mostly sunny except partly cloudy with isolated afternoon thunderstorms over the eastern desert near the Colorado River.	80 to 95 mountains. 90 to 100 valleys. 90 to 100 upper deserts. 105 to 115 lower deserts.	10 to 20%.	Southeast to southwest 5 to 15 mph.
Western Great Basin Mostly sunny skies with afternoon cumulus and isolated thunderstorms over the far northeastern and southern portions of the state.	North valleys: 84 to 95. South valleys: 88 to 106. Mountains: 70 to 92.	North valleys: 5 to 16%. South valleys: 11 to 18%. Mountains: 12 to 24%.	Southwest to west 5 to 15 mph. In the northeastern corner of the state, afternoon gusts of 25 mph.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Eastern Great Basin Idaho, Bridger-Teton: Mostly sunny Utah: Mostly sunny.	Idaho, Bridger-Teton: 57 to 67 mountains, 67 to 86 valleys. Northern Utah: 65 to 77 mountains, 77 to 90 valleys. Southern Utah, Arizona Strip: 70 to 88 mountains, 88 to 95 valleys.	Idaho, Bridger-Teton: 20 to 35% mountains, 16 to 25% valleys. Northern Utah: 20 to 30% mountains, 11 to 22% valleys. Southern Utah, Arizona Strip: 20 to 35% mountains, 10 to 20% valleys.	Idaho, Bridger-Teton: Upslope and light. Northern Utah: Upslope/upvalley 4 to 8 mph. Southern Utah, AZ Strip: Upslope/upvalley 4 to 8 mph.
Rocky Mountain Dry northern portions, with scattered afternoon thunderstorms elsewhere.	Mid 80s to lower 90s south, with mid to upper 70s in the north.	25% to 35% in most locations, except 15% to 20% over central Wyoming and portions of western and southeast Colorado.	Southerly 15 to 25 mph in the southeast, and west to northwest 10 to 22 mph elsewhere.

FREQUENT SPOT FIRES ACROSS THE LINE

There are few watchout situations that state more clearly how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)
- Do you have a plan for long-range spotting? In what fuel type and under what conditions will you likely have long-range spotting? What types of plans can you think of for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.
- Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, etc.) and how you will get good information from that person. (Are you relying on an air attack who is busy with airtankers?)
- Is the primary burning period ending? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.
- To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
